portfolio

PROFESSIONAL SUMMARY

Computer Engineering graduate (Software Engineering) from the University of Buea. Full-stack developer with production experience in React, Vue.js, Node.js, Python, and FastAPI, including a computer vision platform for real-time object tracking in video streams. Shipped enterprise dashboard, task management, and network monitoring systems during internship and project work. Seeking a software engineering role where I can deliver reliable, well-architected products from day one.

EDUCATION

BSc Computer Engineering, University of Buea	Oct 2022 - Dec 2026 (Expected)
Advanced Level Certification, Baptist High School	Sep 2021 – June 2022
Ordinary Level Certification, Saker Baptist College	Sep 2015 – June 2020

PROFESSIONAL EXPERIENCE

Software Engineering Intern — Zinger Systems Ltd, Buea, Cameroon Aug 2025 – Feb 2026

- Implemented backend business logic with Parse Server and MongoDB across core modules of an enterprise application used by internal teams and clients.
- Built 3 production frontend modules in Vue.js and TypeScript, improving page load performance and reducing duplicate code across the codebase.
- Produced UML diagrams and architecture documentation adopted by the team for multiple subsequent features.

Event Planner — She Code Africa, Buea, Cameroon (Volunteer) Apr 2023- Present

- Organized tech events and workshops to support women in technology across the region.

LEADERSHIP & COMMUNITY ENGAGEMENT

Core Member — Google Developers Group (GDG), University of Buea Sep 2025 – July 2026

- Organized tech-focused events including Build with AI, mentorship programs, and the local phase of the Hult Prize.
- Led workshops to support student skill development and collaborative project building.

Event Host — Ocean Hack (supported by National Geographic & The Nature Conservancy) 2024

- Coordinated a week-long innovation challenge addressing marine pollution through software, hardware, and hybrid solutions.
- Guided participants, managed logistics, and fostered innovative problem-solving across multidisciplinary teams.

KEY PROJECTS

Tracking Studio — Object Instance Tracking Platform *RestAPI - React YOLOv8 - MobileNetV2*

Web platform for focused single-object tracking in video streams. Custom two-state tracker combining IoU spatial gating, velocity prediction, and appearance embeddings, with JWT authentication and zone dwell analytics. Final-year dissertation project, built end to end solo.

QoS Monitoring Portal

[React](#) [Node.js](#) [OrientDB](#)

Full-stack portal monitoring mobile network performance with real-time dashboards and analytics across multiple network nodes and sites.

Full-Stack Task Management Application

[Vue.js](#) [TypeScript](#) [Quasar](#) [ParseServer](#)

Enterprise platform with role-based dashboards, validated task states, weekly planners, and performance analytics.

Defendant Dashboard Analytics

[Vue.js](#) [ApexCharts](#)

Data-driven dashboards with graph and table views, dynamic filters, and drill-downs across large record sets.

Cutie — Productivity & Self-Care App

[React Native](#)

Mobile app for daily planning and mood journaling with animations and offline local persistence.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Java, React, React Native, Vue.js, Node.js, FastAPI

Databases & Storage: MongoDB, PostgreSQL, MySQL, Firebase, OrientDB

Tools & Platforms: Git, GitHub, Parse Server, Quasar, ApexCharts, YOLOv8

Core Competencies: Full-Stack Development, System Architecture, UML Design, Computer Vision, QA & Testing, Technical Documentation

Languages: English (Native) | French (Basic) | Pidgin (Fluent)

Open to remote and on-site opportunities
